1957 - 1958 GLADIOLUS OFFERINGS

We take pleasure in presenting our 1957-1958 catalog for your approval and consideration in which is listed nearly 80 varieties of Gladiolus covering a wide range of color and sizes. Prices in various quantities to best fit your needs.

Glads are quite easily grown and are not exacting as to soil. For best results we suggest they be planted in rows of 18 to 24 inches apart with about three large bulbs or five or six medium bulbs per lineal foot. Of most importance is to get good varieties and young vigorous bulbs.

ALL-AMERICAN GLADIOLUS SELECTIONS

In an effort to better serve their customers, our North America Gladiolus Grower Association has established the organization Select Glads Inc. Select Glads Inc. has thirty directors operating thirty test gardens reaching from British Columbia to Florida, and Ontario to California. Hundreds of Hybridizers pet seedlings are grown in each and all test gardens under a number so the director doesn't know whose pet it is. Performance ratings are given each seedling by each director as he observes it in his test garden. Seedling ratings from all the test gardens, with widely varying climate and soils, are compiled by Executive Secretary of Select Glads Inc. Directors then study the composite rating and select the All-American winners if any are deemed worthy. This selection and award should assure the fanciers guidance in getting the top new variety introduced.

Two fine varieties received A.A.G.S. Award in 1956 and 1957 with Emperor being the only selection for 1958.

APPLE BLOSSOM 460 (Baerman-Fisher A.A.G.S. '56) (Pat)

A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush of corona or cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of a very heavy substance, are open at a time on spikes up to five feet tall.

ROYAL STEWART 450 (Pommert A.A.G.S. '56) (Pat)

A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performances. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flowerheads frequently carry up to twelve flowers open at one time.

CARIBBEAN 376 (Baerman-Fisher A.A.G.S. '57) (Pat)

The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. CARIBBEAN opens from 9 to 11 precisely styled florets at one time in formal, double-row placement. It possesses a quality uncommon to many varieties and almost a rarity among "so-called blue glads", that of extreme vigor.

MAYTIME 442 (Baerman-Fisher A.A.G.S. '57) (Pat)

A light-hearted charm surrounds this brightly colored glad. The gracefully ruffled deep, pure pink florets with their contrasty large white throats bring back the memory of the freshness of May-blooming flowers. MAYTIME is a lithesome glad of good height. It readily opens 8 to 10 florets on spikes of five and one-half feet tall. A robust grower, MAYTIME has wonderful plant health

1958 ALL AMERICAN GLADIOLUS SELECTION

EMPEROR 471 (Baerman-Fisher A.A.G.S. '58) (Pat)

A true aristocrat, this glad of regal purple trimmed in ermine-white presents a stately display. Emperor makes majestic spikes growing five feet or more tall with 7-8 of its round, recurved florets open at one time. The plants are unusually robust and the spikes consistently tall and straight. The rich, distinctive color of Emperor, its health and vigor, and ease of growing are characteristics which make it an ideal flower for the home garden. It has already distinguished itself on the show table as a seedling and it possesses the qualities of a champion. The outstanding color and fine qualities of Emperor resulted in All-American Award for 1958.

Priced (All varieties and large bulbs only) 50c each, 6 for \$2.65, 12 for \$5.00 of one variety or a combination of varieties, 1 each of the 5 varieties \$2.25.
